

COVID19 -

Basic information

COVID-19 infection-

Viral disease caused by novel corona virus

It is transmitted through droplet after sneezing from infected persons

As it spread through contact and through droplet infection- Hence spreading at breakneck speed

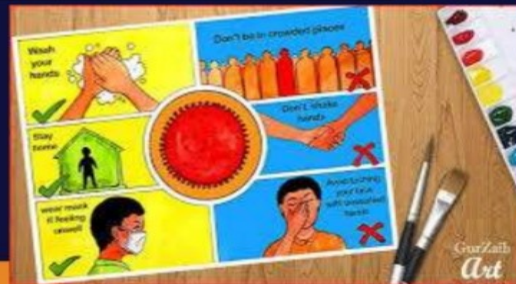

Causes high morbidity

Plus point is that it has low mortality rate

Children and aged persons are increased risk. Hence it is necessary to pull all resources into halting it

Facts about COVID 19
And
how to prevent it
19
PREVENTI
What we can do

I can do it

MAKE IT AS A HABIT

Do's

Wash your hands regularly. Use soap and water or alcohol based hand rub
